

## ABOUT SICILY

Sicily is an island located in the south of Italy, in the heart of the Mediterranean sea, of which it's the major island.

Because of its strategic position, since the Ancient Greece Sicily has been aim of invasions and settlements from many peoples. So, travelling trough this region, you can admire the ancient greek temples and the Roman's villas, as well as many different architectural elements of Arabic, Byzantine and Norman influences.

The territory is extremely varied: in Sicily you can relax on uncontaminated beaches, visit villages and arts' cities, have trekking, go skiing on the Mount Etna during winter and discover the country's nature.

Taormina is one of the most fascinating and characteristic italian cities. Settled on a hill of the Monte Tauro at 206 metres altitude at the sea level, the city overlooks the Ion sea as a terrace, from which you can enjoy a breathtaking view. Walking through Taormina's roads you'll be fascinated by the beauty of this city, that has always been a destination for tourists and a place of inspiration for poets and writers.

In Taormina there's the ancient greek theatre, one of the oldest and well preserved in Europe, that still now during the summer hosts events, concerts, ballads and theatre works.

In Sicily's east side , between Catania and Messina, there's the Mount Etna. Formed around 600.000 years ago, it is the highest active volcano in Europe, with 4 submittal craters.

With its moonlit landscape, the magic view of the sea to the Catania Gulf and the Aeolian Islands and its proximity to the sea, the Etna excursion represents a must in Sicily and an unforgettable experience.
