

MarcoPoloLine (MPL) announces partnership with logistics software leader CargoWise

MPL is pleased to announce a new partnership with WiseTech Global, the technology company behind the world's leading global logistics software, [CargoWise](#).

This global partnership is a strategic initiative designed to strengthen the network and open up a range of benefits for MPL members, including access to exclusive cost-savings on the integrated software platform.

For those not already familiar with the solution, CargoWise allows for instant sharing of shipment data, rates, quotes and bookings between forwarding agents, as well as real-time visibility and tracking of shipments. Please see a [video snapshot](#) here.

CargoWise has fast become the industry standard solution for forwarders and logistics professionals, so this is great news for members and the network as a whole. In fact, many MPL members are already using CargoWise for their operations and we believe all members will experience vast improvements from the system.

The range of modules available include freight forwarding, customs clearance, warehousing, shipping, tracking, land transport, rate management, accounting, e-commerce, cross border compliance and more.

To find out more information or to see a demo, simply get in touch with the network or email Jessica.Elias@wisetechglobal.com

We look forward to releasing more detail on this partnership in the coming months/weeks.

About CargoWise

CargoWise is a single source, deeply integrated and truly global platform designed to meet the diverse needs of the logistics industry.

CargoWise enables customers to execute highly complex logistics transactions and manage their operations on one database across multiple users, functions, offices, countries, currencies, and languages.

A highly flexible and feature-rich system, CargoWise delivers powerful productivity, extensive functionality, comprehensive integration and deep international compliance capabilities for businesses of all sizes.

CargoWise is our network's Exclusive Technology Partner, entitling members to a range of discounts and benefits.
